

**Hand platen - Anvil die cutter  
Technical specification,  
Plator 130-170**

**Die cutting of carton to 7 mm corrugated  
Laser surveillance for highest safety.  
Extra mechanical breakers  
Extra protective frame (yellow)  
PLC-control and ABB-motor  
Robust cast iron frame**

**Hardened die cutting plate (bombaged) with  
pneumatic lifting  
Quick locking for die form  
Sheet counter  
Central lubrication  
Parallell die cutting operation last 40 mm**

**Sizes and data**

Largest sheet size: 1300 x 1700 mm  
Max cutting area: 1300 x 1700 mm  
Inside quick lock frame: 1220 x 1685 mm  
Max mech. speed: 12-20 strokes/min  
Maximum pressure: approx 400 tonnes  
(18 m cutting knives)

**Dimensions**

Length: 2190 mm  
Width: 3100 mm  
Height: 2160 mm  
Weight: 12 ton  
plus electrical cabinet

**Technical data**

Motor: 11 kW, ABB  
variable speed  
Air coupling: Deublin with Ross  
double valves, 20 L/Mn  
Lubrication: Automatic  
Pressure setting: Scales on both sides  
El .standard: Telemecanique,  
Omron, Schmersal  
Connection 3x 400 V, N+PE,  
50Hz

**The machine is CE-approved**
